

THE BRITISH COLUMBIA AVIATION MUSEUM

Presents: Guest Speaker - NORM DRESSLER

Wednesday, November 15, 2023 at 7:00 PM

The Evolution of Aviation Meteorology

The weather; everybody talks about it but nobody does anything about it. Well now we have!

Norm will outline the evolution of the science of meteorology and identify the special requirements for aviation. New advances discussed include weather ships, weather radar, radiosonde technology, satellite imagery, numerical modeling and now artificial intelligence. You will leave the talk with a greater appreciation for the challenging detail work done to prepare the local weather forecast!

Norm has more than 33 years experience as an aviation meteorologist with the RCAF, including 15 years as the Officer-in-Charge of the Victoria Weather Office. He also served as a flight instructor at the Victoria airport and played a key part in the creation of the BC Aviation Museum.

Admission - \$5.00

Free Coffee, Door Prizes!
